What's In It? assignment

Part 1:

Look around your home or place of work. List at least 10 substances you find, and their ingredients. Look for chemical names, If you can't find them. Look for a website or 800 phone number to call. Choose from a variety of substances. Do not test the chemicals in any way; just collect information from the labels.

Part 2 involves experimentation and will be done later.

Substance	Ingredients	Hazards (flammable?)	Solubility	pH	Comments and Properties (list)
